

PRODUCT OWNER & BUSINESS ANALYST

Fatih/İstanbul/Turkey · +90 552 381 99 20 · mustafa.r.basar@gmail.com · [linkedin.com/in/mustafa-basar7/](https://www.linkedin.com/in/mustafa-basar7/)

SUMMARY

I bridge the gap between publishing, advertising, and tech teams for 50+ media brands like Sabah, Takvim, and Fotomaç. My expertise is turning business goals into user-friendly web/mobile solutions using Scrum and Agile.

When I am not crafting documentation or UML diagrams, I use Power BI to transform data into actionable insights.

Passionate about agentic AI and building side projects that push media workflows forward

EXPERIENCE

Turkuvaz Media Group Feb 2023 - Present

Product Owner & Business Analyst

- Web and Mobile Application **Analysis and Documentation** for **50+ Brands** (including Sabah, Takvim, Fotomaç, ATV, and A Haber) Ensured seamless coordination between **editorial, advertising, and technical teams** using **Scrum/Agile** methodologies, achieving satisfaction in user-centric solution delivery.
- Aligned project **requirements** with business goals through **UML diagrams and Power BI reports**.
- Made data-driven decisions that improved media platform performance by 30%.
- Designed and implemented responsive strategies across five platforms (**web, mobile, tablet, smart TV, AMP**).
- Led cross-functional Scrum teams of **15+ members** and facilitated sprint planning, review, and retrospectives.
- Prioritized product backlogs and executed 6-month roadmap planning aligned with strategic goals.
- Managed the integration of advertising technology platforms such as **Google Ad Manager and OpenX**.
- Not only utilized **Google Search Console** and **Google Analytics** effectively, but also integrated them within a **Model-Context-Protocol (MCP)** framework to implement **AI-driven** insights for SEO optimization and user behavior analysisWeb

Business Analyst Jun 2020 - Feb 2023

- Supported integration and development of a **AI-enhanced digital asset management system**, cutting retrieval time by **40%** for 3M+ media files.
- Authored 50+ user stories and BPMN diagrams, using **Power BI** to visualize process improvements and ensure alignment between technical teams (DevOps, QA) and business units.
- Collaborated with IT teams to develop a unified **CMS platform**, reducing content publishing time by **35%** for international stakeholders.
- Defined KPIs and built interactive dashboards to track project performance and content engagement metrics.
- Mapped and optimized **content approval workflows** using process mining techniques, reducing approval time by **25%**.

SKILLS

<u>Data Analysis & Modeling:</u> - SQL Querying (MS SQL Server, PostgreSQL) - ERD & Data Modeling - Power BI (DAX, Power Query, Dashboard Automation) - Predictive Analytics & Data Storytelling - KPI Tracking & Data-Driven Decision Frameworks <u>Business Process Optimization:</u> - BPMN 2.0 & Process Mining - Use Case/User Story Mapping - Stakeholder Requirement Elicitation - SDLC & Agile-Waterfall Hybrid Models <u>Project Management:</u> - Agile/Scrum, Sprint Planning, JIRA, Confluence, Azure DevOps, Zoho.	<u>AI & Emerging Technologies:</u> - Python (Basic Automation, Basic NLP, and Basic Data Analysis) <u>LLM Frameworks:</u> - Hugging Face - LangChain: a framework for developing applications powered by large language models (LLMs). - CrewAI: Agent collaboration frameworks <u>AI Development Tools:</u> - Cursor - Windsurf (AI code editors) - LangFlow: Drag-and-drop agent/MCP server builder - Claude Codex	<u>AI Protocols & Standards:</u> - A2A Protocol: Agent-to-agent communication - MCP (Model Context Protocol): Anthropic's tool access standard - Vector databases such as mem0, pinecone, and zep <u>Open-Source LLM Engagement:</u> - Experimenting with Llama, Mistral, Qwen models <u>Agentic Workflow Design:</u> - Python-based autonomous systems - Graph Memory: Implementing memory systems in agent architectures
